

Iris Khongsook

📍 Bangkok, Thailand

Junior Web Developer

A fresh grad of Junior Software Developer bootcamp at Generation Thailand, I am determined to become a successful Web Developer. With past experience in scrum and agile working fashion where I got to develop a curriculum and take part in building an application, this equipped me with useful basics to function as a Software Tester or a Software Developer. Passionated about self-improvement and upskilling, I am currently taking a Data Science course to explore and to acquire a new set of skills.

FEATURED PROJECTS

Infinity Health

Exercise tracker website

Final group project: an exercise-tracker website which allows users to keep records of their exercise activities--adding, editing, deleting their activities with reminders and their achieved milestones using MERN stack with login capability and Vercel for production deployment

- Production: <https://infinity-health.vercel.app/>
- GitHub:
 - Frontend: <https://github.com/irisprae/project-infinity-health-prae>
 - Backend: <https://github.com/irisprae/backend-infinity>

Jammming Playlist

Creating your Spotify's playlist website

This responsive website is developed by Class-component ReactJS which allows users to create playlist and save to their Spotify's account by fetching data via Spotify's API using Surge for production deployment.

- Production: <http://irisprae.surge.sh/>
- GitHub: <https://github.com/irisprae/ReactJS-Assessment>

Colmar Academy

A responsive mock-up design website

This website is implemented by HTML and CSS according to the mock-up design on Codecademy using Media Query for a responsive mobile site.

- Production: <https://colmar-academy-gules.vercel.app/>
- GitHub: <https://github.com/irisprae/colmar-academy>

EXPERIENCE

2014 - 2015

Project Facilitator

LearnBalance Group (Bangkok, Thailand)

My Echo Project (an English learning application, sponsored by 'Foundation of Virtuous Youth' and by the government in 2016):

- Implemented content on My Echo application
- Quality controlled the content on My Echo application
- Tracked controlled-group users of My Echo application on learning improvement and feedback
- Coordinated with CMU's Language Center point of contact to run the project using agile methodology

For full work experience, please visit my [LinkedIn](#).
